

TECHNICAL SYMPOSIUM

LOW CARBON HEATING PUZZLE

Sometimes heat pumps are the right low carbon solution for a church, and sometimes they're not. All churches are not the same, and all heat pumps are not the same. Can we figure out what the key issues and criteria are? What are the main obstacles? How can churches make the right decision for their circumstances, and to not end up with very expensive mistakes? Let's talk with some experts.

Monday 24th March

All Saints Church,
Bedworth
CV12 8NH

9:30 - 16:00

FREE to attend,
lunch included

Registration
via ChurchSuite

BEING PART OF THE SOLUTION

Enquiries to:
eco@bedworthparish.org

TRAVEL

Bedworth can be reached by bus, train or car.

- By bus: take Stagecoach routes 56 or 148, which stop in Bedworth between Nuneaton and Coventry. Alternatively National Express route 20 also connects Coventry, Bedworth and Nuneaton.
- By Train: there's an hourly shuttle service to Bedworth station between Coventry and Nuneaton
- By car: **What3Words** - aim for **///flute.sorry.ears** for access to both car parks, or scan the QR code below. **Parking is £5.50 for the day.**

ACCESSIBILITY

All Saints church has level access from the car parks, bus stops and train station, and also within the building. There is an accessible toilet on the ground floor, and also on the first floor which has a lift for access.
